COMMUNICATION TO ACCOMPANY FILING OF CONTINUATION APPLICATION

CLAIMING PRIORITY FROM PRIOR APPLICATION NO. 10/121,797

FILED APRIL 15, 2002

Dear Sir:

To accompany the filing of the Continuation Application filed concurrently herewith, Applicant respectfully requests entry of the following remarks responsive to the office action dated May 30, 2003 in the prior application.

Claims

Allowed and Allowable Claims from the Priority Application.

Claims 2-4 correspond to claims 10-12 of the '797 application. These priority claims were allowed in the office action.

Claim 1 corresponds to claim 7 of the '797 application rewritten in independent form. Priority claim 7 was an allowable claim if rewritten in independent form.

Rejection of Priority Claim 9 under 35 U.S.C. 103(a).

Claim 20 herein corresponds to claim 9 of the '797 application. Priority claim 9 was rejected under 35 U.S.C. 103(a) as being obvious over Du Brul in view of Gasper.

The examiner asserts that "Du Brul discloses all the limitations of [priority] claim 9 with the exception of the raised or recessed indicia. Such indicia is a known means of providing users with tactile feedback when learning letters. Gasper discloses in column 2, lines 45-48 one such example of a series of letters which is present in raised format. It would have been obvious to one of ordinary skill in the relevant art to modify the device disclosed by providing raised indicia for the purpose of providing the user with indicia that can be tactilely sensed, for providing additional sensory feedback."

Applicant respectfully submits that claim 20 herein is patentable over the art of record.

Claim 20 relates to an educational tool having a writing board having a writing surface, a raised rim extending around the surface for holding a writing medium, and raised or recessed indicia disposed about the surface to provide additional sensory feedback.

As understood, Du Brul discloses a writing board having a writing surface and a raised rim extending around the surface. Gasper discloses raised indicia that can be tactilely sensed.

The examiner states it would have been obvious to modify Du Brul with the raised indicia of Gasper to provide the educational tool claimed in claim 20. Applicant disagrees and respectfully submits that the Du Brul and Gasper references do not establish a *prima facie* showing of obviousness.

A proper Section 103 rejection must be based on a *prima facie* showing that it would have been obvious to a person of ordinary skill to combine the references. Some of the elements to establish

a *prima facie* case of obviousness include some suggestion or motivation (either in the references themselves or in the knowledge generally available to one of ordinary skill in the art) to modify the reference or to combine reference teachings, and the prior art reference (or references when combined) must teach or suggest all the claim limitations. See MPEP §§ 706.02(j), 2142.

The proposed combination by the examiner does not meet the basic criteria stated above. There is no suggestion or motivation in the Du Brul or Gasper references to combine the reference teachings. The examiner makes only a conclusary statement that it would be obvious to combine references but does not identify the motivation to do so other than the teachings of the applicant herself.

A proper Section 103 rejection not being made out in the priority application, allowance of claim 20 herein is respectfully requested. Claims 18-23 and 25-43 depend from allowable claims and are thus allowable.

Conclusion

Applicant submits that the application is in condition for formal allowance. Such action is solicited.

Respectfully submitted,

DONNA JAMES
